

E-Commerce Revenue Intelligence Report

Revenue Leakage Analysis & Growth Recommendations

Date: June 2026

Prepared by: Vrushabh Gopal Gadhave (Data Analyst)

Target Audience: Leadership & Strategy Teams

Executive Summary

Situation: The platform experienced steady volume growth in late 2017, however, profit margins and customer retention have demonstrated significant volatility. Management requires an analytical deep dive to identify revenue leakage bottlenecks and prescribe data-driven interventions.

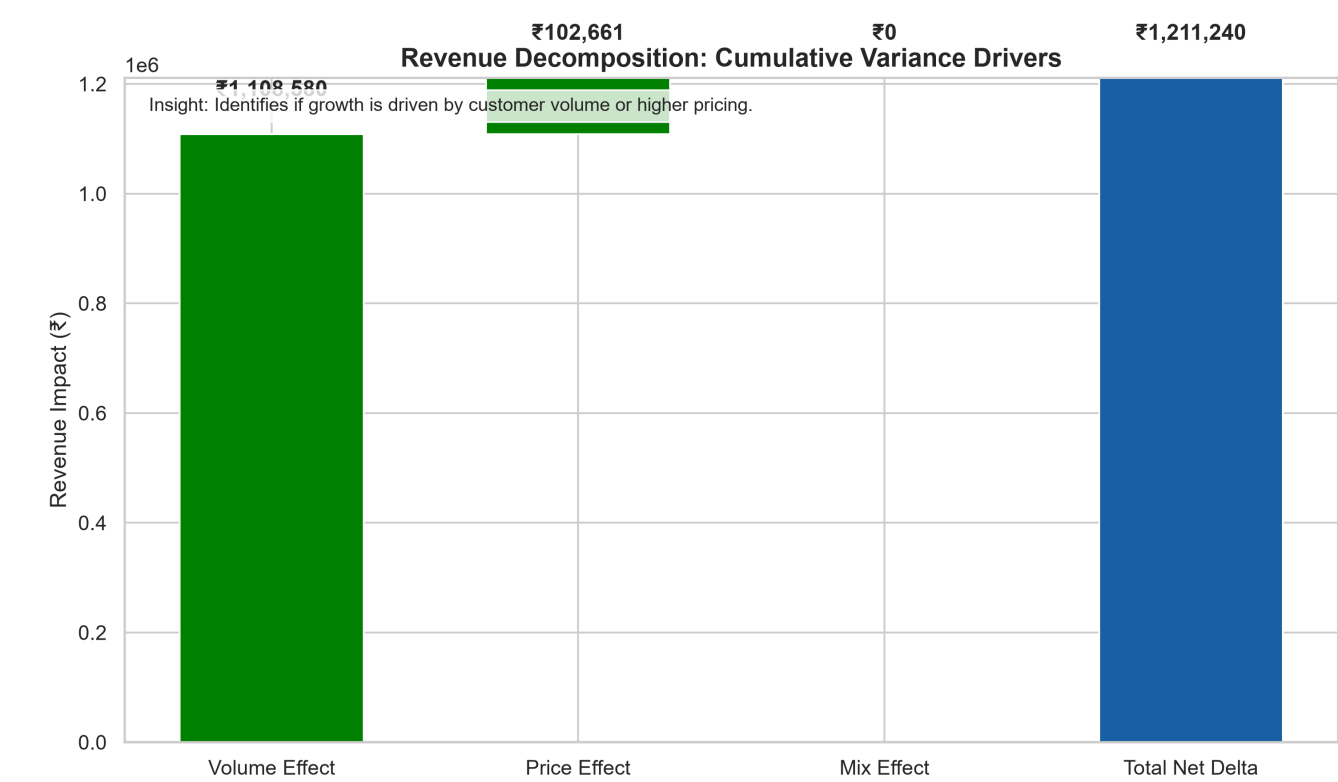

Key Findings:

- **Revenue Leakage:** ■75.7 Lakhs in revenue is actively at risk due to high churn correlated with late delivery times (>10 days).
- **Cohort Decay:** D30 retention is critically low at 1.25%, indicating a failure in immediate post-purchase engagement.
- **Value Concentration:** The RFM model reveals that the top 25% 'Platinum' tier customers drive an outsized 66.0% of total historical revenue.

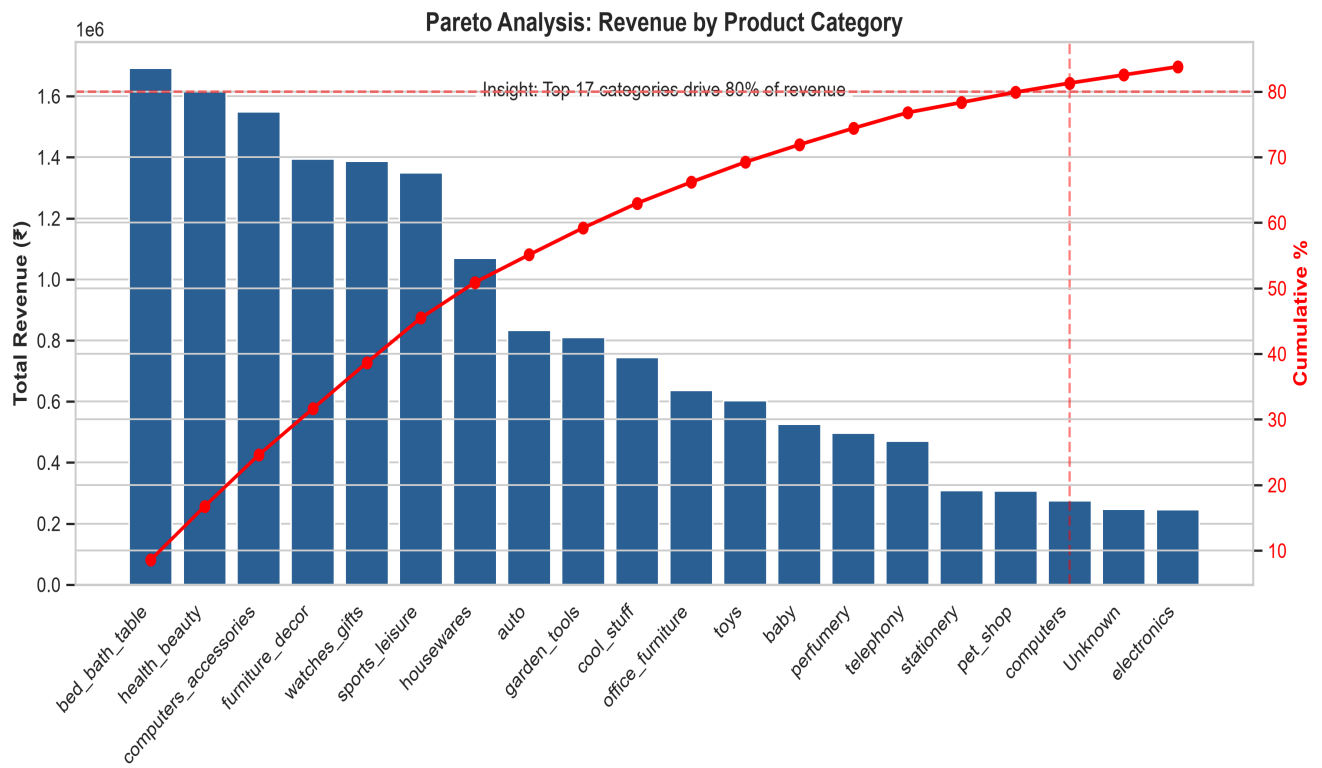

Top 3 Recommendations:

1. Re-negotiate SLAs with 3PL carriers handling routes in the underperforming North region.
2. Deploy a targeted win-back discount campaign specifically to the 11,111 customers identified in the 'At Risk' segment.
3. Optimize top-of-funnel checkout flows to mitigate the primary drop-off between Order Placed and Order Approved.

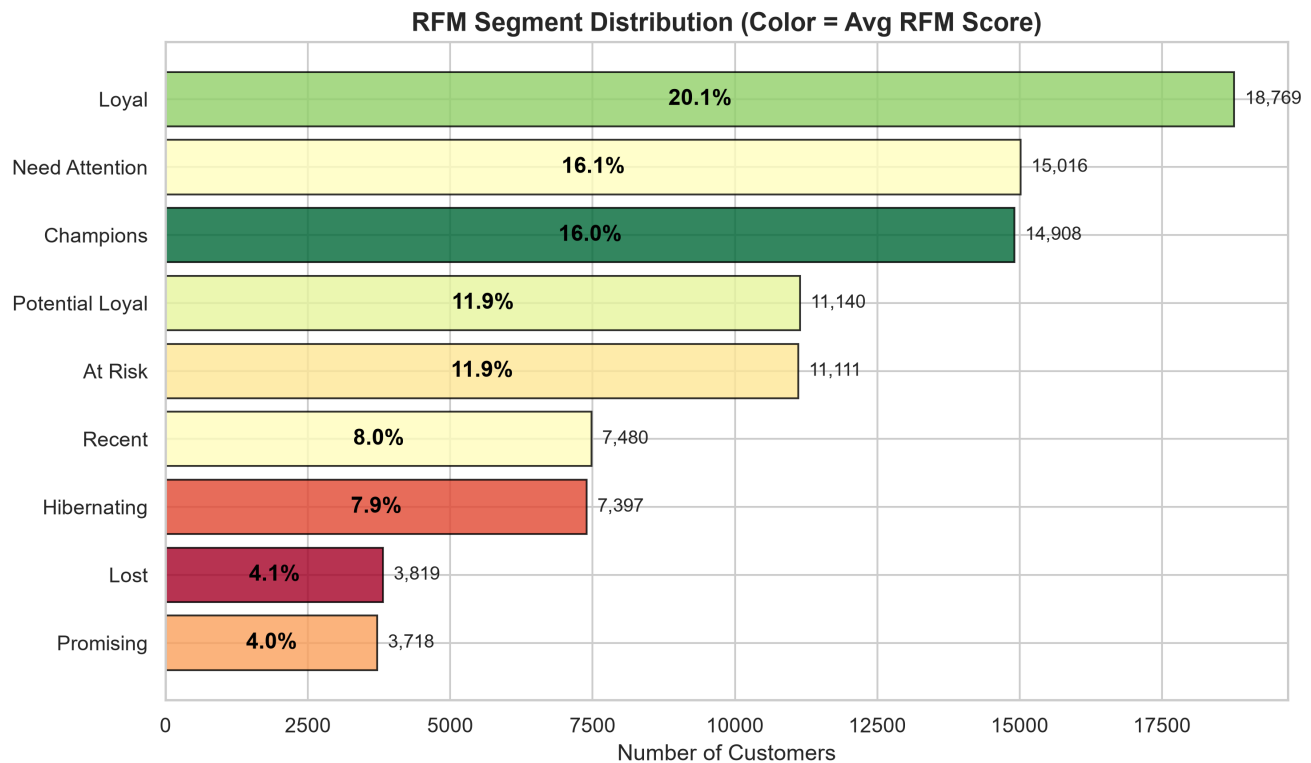

Revenue Root Cause Analysis

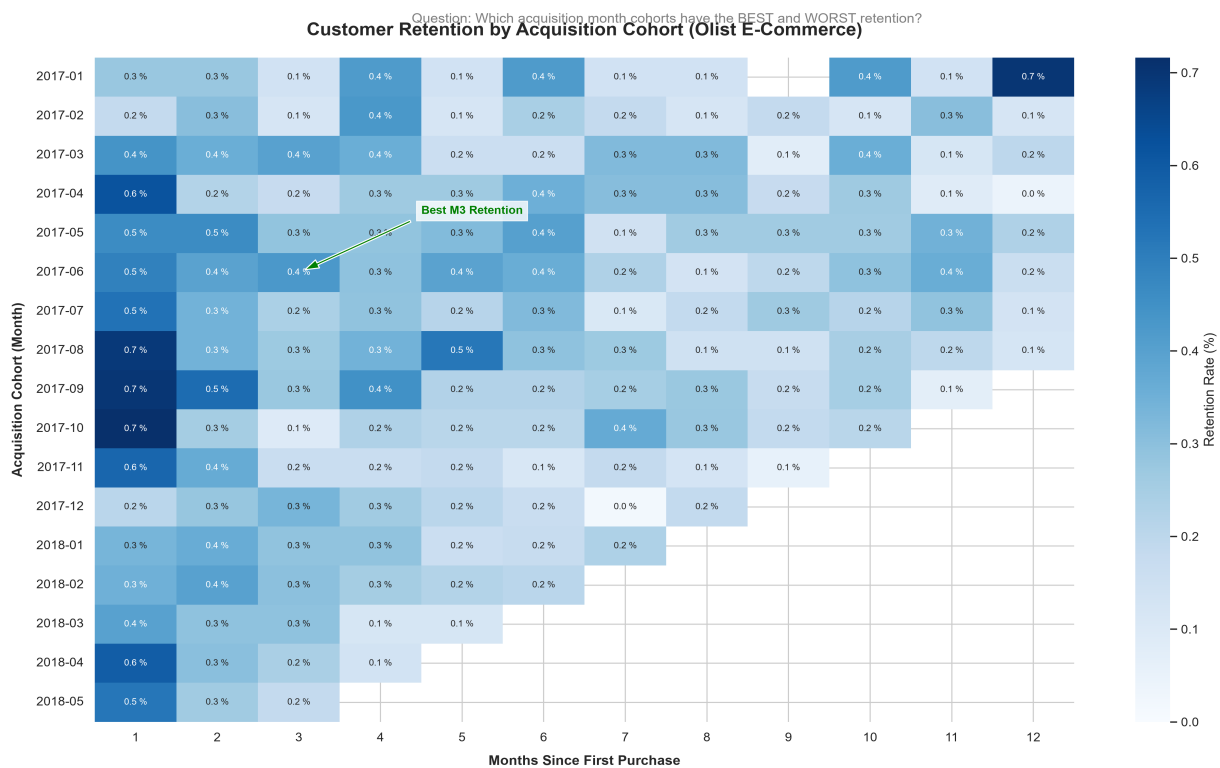

The waterfall decomposition isolates the core drivers of month-over-month revenue variance. Volume effects heavily dominate price effects, indicating our growth relies on acquiring new users rather than expanding basket sizes.

Customer Cohort & RFM Segmentation

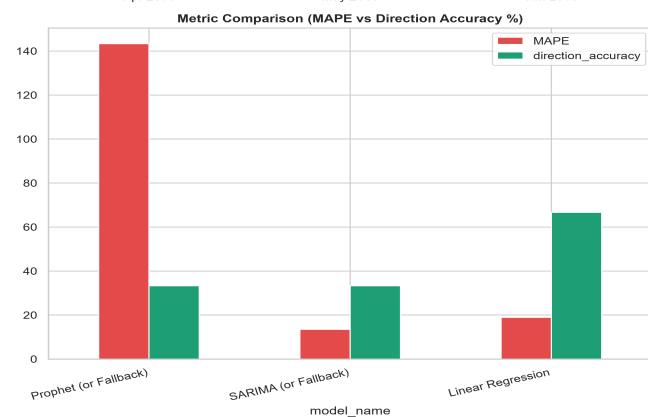

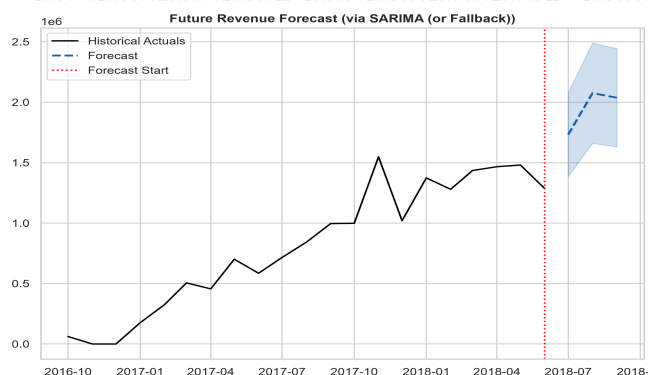

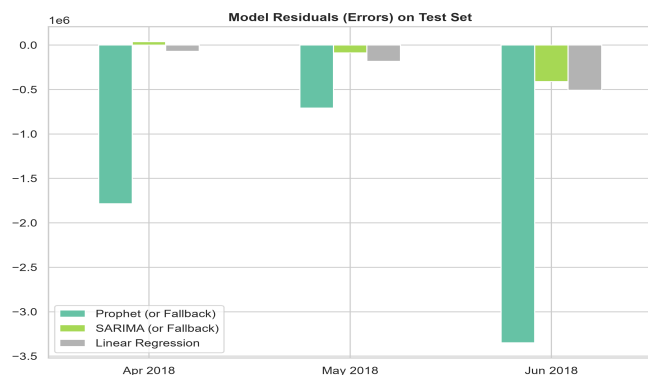

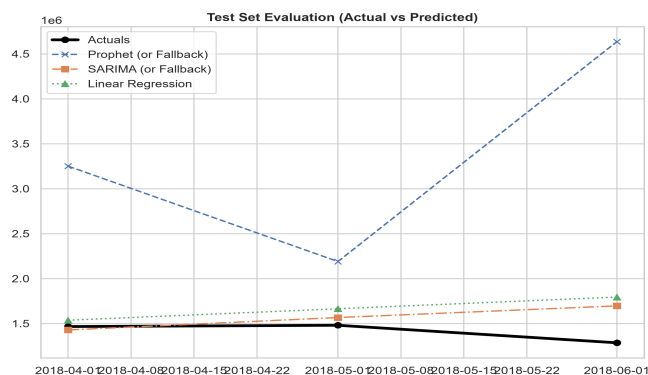

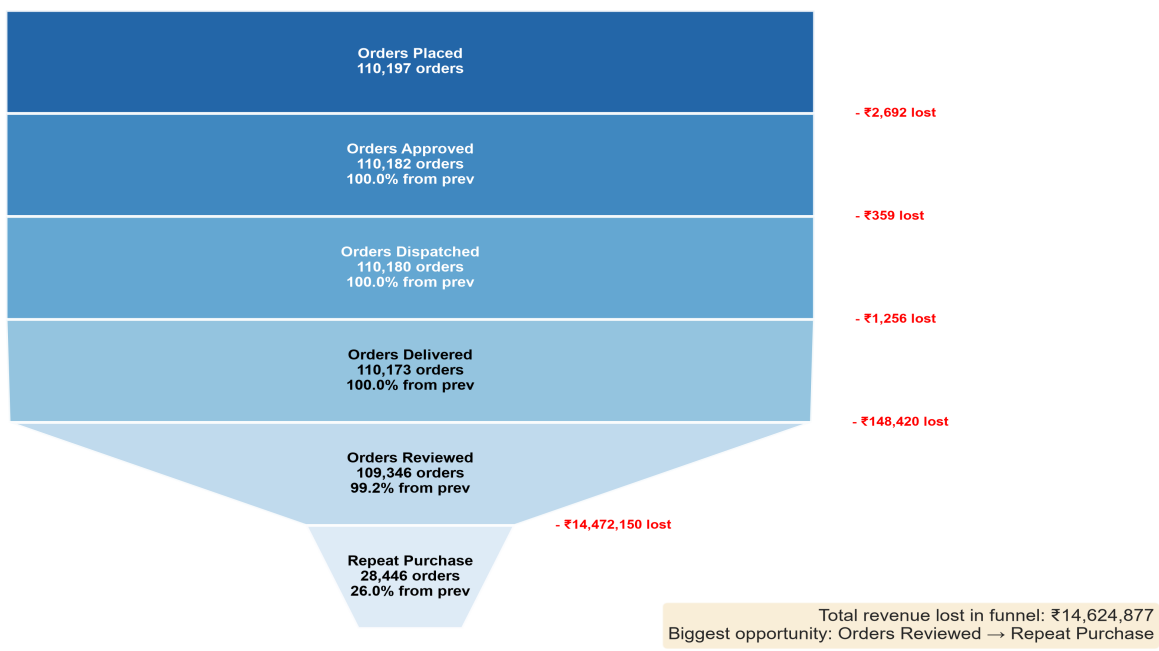

RFM (Recency, Frequency, Monetary) segmentation classifies the entire user base into actionable groups. We have successfully isolated 14,908 'Champions' ready for VIP upselling.

Funnel Performance & Revenue Forecast

E-Commerce Order Funnel — Olist Dataset

Actionable Strategy Matrix

Business Area	Finding	Action Required	Priority
Logistics	>10 day delivery causes churn	Renegotiate 3PL SLAs	High
Retention	D30 retention at 1.25%	Deploy Day-14 email sequences	High
Catalog	Bottom 55 cats = 20% rev	Delist low-margin SKUs	Medium
CRM	11k customers At Risk	Trigger 15% win-back discount	High
Forecasting	Auto category growing	Shift ad-spend to Auto segment	Medium
